

Hour For Peace NoCo Tribute to Claude Swanson, PhD

December 29, 1946 - June 28, 2022

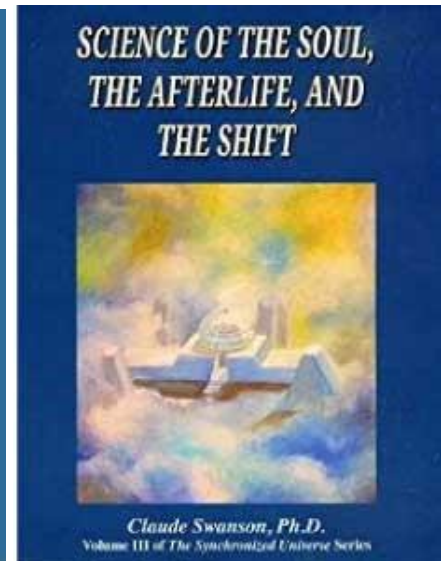

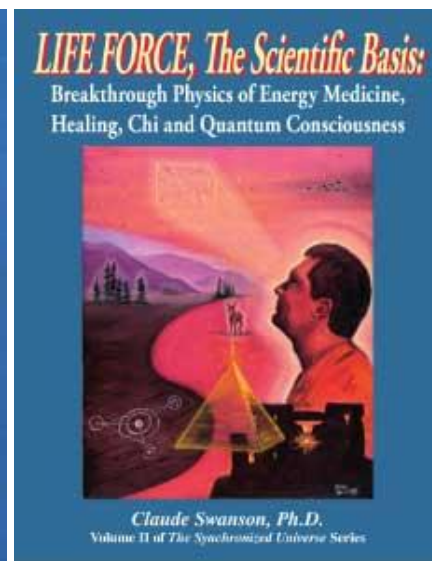

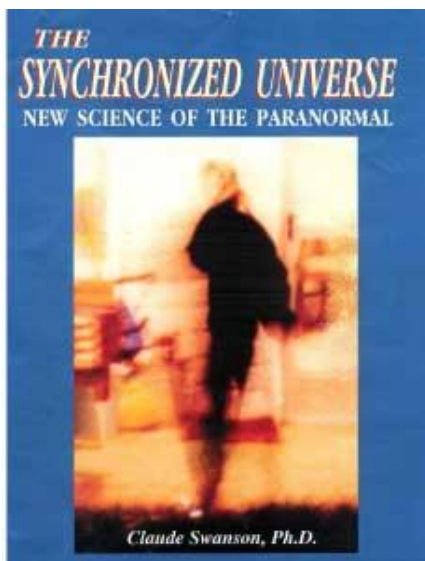

By Rev. Dr. Victoria Gardner, Area Coordinator

MIT and Princeton educated PhD Physicist Dr. Claude Swanson was a keynote speaker at the Hour For Peace NoCo several times, the last time in 2013 at Plymouth United Church of Christ in Fort Collins. Since the Hour For Peace is centered on synchronized prayer, we are extremely grateful for his scientific research proving its power and efficacy. His first book "The Synchronized Universe" studied and documented scientifically what happens when many minds pray for and focus on creating peace at the same time. The Hour For Peace is blessed to have a copy of it and his last book "Science of the Soul".

We are confident that in attaining Eternal Peace, he is also rejoicing in all the additional Knowledge and Wisdom he's gaining in the Next Life!

Dr. Swanson's family has preserved his research and access to his published works. Their hope is that his books, library and equipment will continue to support exploration into the mysteries of our universe . . . including how prayer works. The *Synchronized Universe* series is available at <https://synchronizeduniverse.com> and will soon include his fourth book.

Dr. Swanson's books explain "new physics" or quantum mechanics; what Western science has left out or covered up. They are the keys to understanding spiritual, psychic, and paranormal events, UFOs, Out of Body experiences, levitation, teleportation, ghosts, Near-Death Experiences, quantum entanglement, the nature of the Afterlife, and the power of intention and focused thought. It explains how "Qi-Gong" masters in China can create miraculous events at great distances in scientific experiments. It explains that death is an illusion and the Soul lives forever.

These are part of the powerful consciousness shift that is occurring right now in our world. It is waking us up to the truth that we are not alone in the universe, that we are immortal souls waking up to a magnificent new reality. We are connected to higher planes and other worlds, and new science reflects this reality. Harnessing this powerful force of thought, intention, and consciousness is the key to creating the world we want. It is for this reason, Dr. Swanson created the "Global Peace Prayer", <https://synchronizeduniverse.com/global-peace-prayer>.

THE POWER OF CONSCIOUSNESS IS KEY TO THE EFFECTIVENESS OF PEACE PRAYERS

One of the great revelations of my life was when I first learned about the POWER OF THE MIND. I had received my Ph.D. in physics a few years before, and thought that I understood the physical world. Then I learned about government experiments into Remote Viewing which taught me that my education had left out some very important things. The mind is much more powerful than I had imagined. This began my thirty year quest to understand consciousness from a scientific perspective.

One part of this research has involved experiments in "mind over matter," the power of the mind to affect distant objects and future events. This has led me to the conclusion, documented in my first three books, that this power is very real. Experiments conducted at the Princeton PEAR Lab in the 1980s and 1990s, for example, showed that human intention can alter physical events at the quantum level. These results are scientifically solid. The "odds against chance" that such events can be accounted for by "coincidence" are now measured in the trillions to one! In other words, the power of our minds, of our intention, of prayer and meditation, is real. It has been proven.

In other experiments, meditators have been able to reduce the crime rate in cities such as Washington, D.C. by over 30% for several months. Others have used this power to accomplish distant healing and to affect radioactive decay in physics experiments. In the global peace prayer, we use this power to help the earth during this time of unrest and change. By linking our prayers together, and sending peaceful, loving thoughts to everyone on the planet and to the planet itself.

The shift that has begun on our planet and in the solar system will trigger psychological unrest in many people. It can also increase Earth changes which can further enhance unrest. We believe that these effects can be reduced by Synchronized Peace Prayers. We can smooth the transition we are presently undergoing. We can help calm fears, reduce aggression, and reduce the severity of earth changes.

There is a certain time of day that is best to conduct peace prayers, and we have learned that simultaneous prayers by many people can have increased power. Therefore we describe below a technique and a schedule that can maximize these effects.

Synchronized Prayers make use of two principles to help with this.

1. To make prayer the most powerful, we ask that everyone around the world pray simultaneously, at the same time. This will increase the power of the prayer, possibly by a factor of several hundred because more people are praying simultaneously. Prayer in each time zone is adjusted so that prayers are simultaneous all around the world. Prayers should be done EVERY DAY.
2. There is also a best time of day to receive prayer, a time when our receptivity is greatest. Our prayers of peace, love and forgiveness, while directed to everyone around the world, may in this way have greatest effectiveness in calming and bringing peace to the world. Let us pray that peace, love and forgiveness penetrate the hearts of all people.

The power of prayer has been known for thousands of years. Recent scientific experiments have proven it. Experiments show that when people pray together at THE SAME TIME, it has EVEN MORE IMPACT. Science has also discovered there is a SPECIAL TIME OF DAY when we are MOST RECEPTIVE to spiritual and intuitive messages. Prayers received at this time are likely to have the greatest effect. If everyone around the world will pray at this time the prayers can have heightened impact, both because of the time of day and because many people are praying together. Fifteen or twenty minutes of concentrated prayer every day at this time can work miracles.

The Princeton PEAR Lab, the Global Consciousness Project, and other research institutions have discovered that consciousness affects physics and can be measured. The human mind and human intention alter the behavior of devices called "random event generators," or REGs. They measure the power of human intention to affect distant events. In scientific studies on prayer, it has been found that when many people pray together the effect is larger.

We propose that the prayer be for world peace, forgiveness of others, healing of Mother Earth, and the awakening of higher consciousness and love for our fellow man. This follows the lessons of the great Teachers of all religions.

"Let us avert war and heal the world through prayer."

Dr. Claude Swanson

Obituary

“Dr. Claude Vince Swanson passed away peacefully in his sleep on June 28th, 2022, in Tucson, Arizona at the age of 75.

Born on December 29, 1946, to Claude Sr. and Dolly Swanson, Claude was driven by an intense curiosity about the world around him. He pursued a career in applied physics, earning his undergraduate degree at MIT and winning the Borden Prize for the highest freshman GPA. He earned a PhD in Physics at Princeton while receiving both the National Science Foundation and Putnam Fellowships, and continued his research as a postdoctoral fellow at Cornell University. Following a leadership position at the Aeronautical Research Associates of Princeton, he founded his own consulting company, Applied Physics Technology, Inc., that carried out studies in applied physics for commercial and government agencies.

But Claude was most passionate about understanding the phenomena that science could not explain. His first pursuit as a graduate student was unified field theory, an ambitious field of physics research that seeks to unite all the governing theories of force and matter in the universe into a single framework. By his accounting, the science of the paranormal was an essential missing piece of that framework. His deep curiosity and this conviction drove his investigations into the paranormal that he documented and shared with the world through his published volumes: *The Synchronized Universe (I)*; *Lifeforce (II)*; and *Science of the Soul (III)*.

His research, his passions, his life's work and his deepest commitment were in pursuit of what he felt was his purpose: to learn and teach how we humans are more than our physical bodies. As an expert on the science of the paranormal, he was an influential author and speaker in the community, and was professionally affiliated with the Monroe Institute, Forever Family Foundation, MUFON, and many others. He was deeply grateful for the close friendship and intellectual openness that he found in these communities.

Claude was shaped by his early life growing up in Gretna, Virginia, as the oldest brother to his four siblings: Tom, Mary Ellen, Patricia and James. He played clarinet in the school band, was an Eagle Scout and paper boy, helped teach his classmates physics, worked at the local grocery store, and helped his father in the summer on his family's several farms. Claude is survived by his two children, Alexandra and William, and their mother Marian; his siblings, Mary Ellen, Patricia and James; and his grandchild, Oliver. He was sensitive, brilliant, loving, complex, and gentle, and we all miss him dearly.”
